## Helping Build a Better Colorado

WTCA Chapters play a key role in the future of the structural building components industry. By working together, we are able to:

- **Have more clout** as a unified group than as individuals acting alone.
- **Produce results more effectively** working together with no duplication of effort.
- **Share ideas and goals** at the local level and set an agenda for our chapter.
- **Participate in decision-making** for the industry and help shape the future.

Plant tours are a perfect way to educate legislators, building and fire officials, and others in your market about the industry.

## Education & Marketing

Since an association is viewed as an independent entity with no proprietary interest and no product sales bias, it is easier to provide education and plant tours to:

- **Contractors, architects, engineers and specifiers** on the advantages of components.
- **Building officials** on the proper use and benefits of components.
- **Fire service** to promote a better understanding of our industry and products.
- **Schools** to educate the local workforce.

## CTMA Meetings

The Colorado Chapter meets quarterly on the 2<sup>nd</sup> Tuesday of March, June, September and December at the Four Points Sheraton, 6363 E Hampton Avenue in Denver unless otherwise noted.

*Join the chapter and your first dinner is free!*

In June 2006, CTMA members welcomed guest speakers from the DOT to review regulations and inspections.

## Save Money with the CTMA Publications Cooperative

CTMA members qualify automatically for our WTCA publications co-op, including products and educational courses. Discounts earned are credited back to each member company at the end of the month.

## Legislation & Regulation

The voice of an association adds to the strength of individual contacts, and establishing good lines of communication can limit the growth of adverse policy that restricts the use of our products.

Together we can build relationships with:

- **Representatives and Senators** by arranging meetings and plant tours.
- **Local policy makers** to influence local regulations as they are written.
- **Building code groups** to guide the code development that governs us.

## CTMA Mission

The purposes of the Association are to advance the interest of its members by promoting and providing for the welfare of the regional structural building components industry, including but not limited to, analyzing and informing the members of conditions affecting or which may affect the industry, informing members of improved operating methods and procedures, conducting education and research activities, technical education, formulating or assisting in the formulation of tests and test methods for industry products, representing the industry in contacts and relations with other organizations, the government and the public, and, in general, engaging in all lawful activities which will enhance the technical and economic progress of the industry.
